Teleflex®

EASY ORDERING GUIDE FOR RÜSCH® BRAND UROLOGY PRODUCTS FROM TELEFLEX

Teleflex is a leading global provider of specialty medical devices for a range of procedures in critical care, home care and surgery. Our mission is to provide solutions that enable healthcare providers to improve outcomes and enhance patient and provider safety. The Rüsçh® Urology Product Portfolio offers a comprehensive line of bladder management solutions including intermittent and indwelling catheters, collection devices, as well as products for operative urology and endourology.

Teleflex provides evidence-based solutions like the Rüsçh® MMG™ Intermittent Catheter, which features a closed system design, proven to help reduce UTIs.^{1,2} Teleflex also offers options that reduce insertion friction,³ like the Flo Cath® Quick Hydrophilic Intermittent Catheter. Rüsçh® Urology Products provide a choice of products to maintain a healthy lifestyle and meet the different needs of our customers both in the home and hospital.

At Teleflex, we understand that one product does not work for everyone and that having a choice is important. That's why we offer a large selection of Rüsçh® Urology product options to meet your patients' needs.

This ordering guide is a quick reference to help you write a prescription for the appropriate Rüsçh® Urology Product.

For product help or more information please call our help line at 1-800-334-4475 or visit www.teleflex.com/urology.

Consult your doctor before changing your bladder management routine. If you have recurrent urinary tract infections, you may qualify for intermittent catheter closed systems. Contact your medical supplier to verify insurance coverage.

INTERMITTENT CATHETER CLOSED SYSTEMS

Teleflex offers a choice of Intermittent Catheter Closed Systems for bladder management including hydrophilic and gel-coated solutions. The Rüsç® MMG™ Closed Systems feature a catheter integrated in a collection bag for no-touch catheterization and an introducer tip to bypass external bacteria. Rüsç® MMG™ Catheters also feature a closed system, which is clinically proven to reduce the risk of urinary tract infections (UTIs).^{1,2}

RÜSCH® MMG H₂O® HYDROPHILIC INTERMITTENT CATHETER CLOSED SYSTEM

When activated, hydrophilic coatings reduce friction and the risk of urethral trauma.³

- Soft silicone introducer protects the catheter from bacteria residing in the first few centimeters of the urethra¹
- Catheter is protected inside the collection bag for “No Touch” catheterization
- Integrated sterile 0.9% saline solution pouch allows the user to avoid potential contamination from having to use an outside water source
- Collection bag holds up to 1300 mL

HYDROPHILIC INTERMITTENT CATHETERS

RÜSCH® FLO CATH® QUICK HYDROPHILIC INTERMITTENT CATHETERS

- System designed for maximum ease-of-use
- Easy open package
- Patented 5" handling sheath on the standard straight catheters allows for “No-Touch” catheterization; 3" sheath on female product; large surface area for those with limited dexterity
- Handling sheath provides a dry grip area on the slippery hydrophilic surface
- Integrated sterile 0.9% saline solution pouch allows the user to avoid potential contamination from having to use an outside water source
- Kits offer the convenience of a small, discrete system while maintaining sterility at home or on the go

COLLECTION BAGS

RÜSCH® BELLY BAG® URINARY COLLECTION DEVICE

- Designed for males or females who have an indwelling catheter
- Conceals more effectively than a leg bag
- Bag fastens around the waist with a woven belt with a quick release buckle
- Enhances comfort and mobility⁵
- Users can sleep with the bag in place, thus it can be worn 24 hours a day and helps to eliminate changing between bed and leg bag
- Minimizes the risk of inadvertent catheter extraction⁵
- Has a 1000 mL capacity and is not made with natural rubber latex
- Contains an anti-reflux valve behind the catheter port preventing reflux urine flow
- The bag is emptied by means of a drain tube with a twist valve that is in the approximate position of the urethra
- Sterile

RÜSCH® BELLY BAG® URINARY COLLECTION DEVICE

ITEM CODE	DESCRIPTION	CASE QUANTITY
B1000	1000 mL	10
B1000P	1000 mL with sample port	10
B1000CT	1000 mL with 24" drain tube	10

RÜSCH® EASYTAP™ LEG BAGS

- Contains an anti-reflux valve behind the catheter port preventing reflux urine flow
- Contains a flip valve for easy emptying
- Is secured to the leg with 2 cloth straps with buttons
- Not made with natural rubber latex
